### [OPMAAK 1](#)

NEW Air curtain for any heat pump system Heating and Cooling Type lengths Applications In addition to the previously described function, the Zephyr DX air curtain can also be used to optimise room temperatures. In 1.000 mm winter the warm air produced by the air curtain prevents draughts in the entrance area of a building, because the air flow works as a barrier and keeps the cold air outside. 1.500 mm...

### [TRANSMISSION LINE ROUTING AND SITING](#)

Considering multiple sensitivities when siting a new line The process for identifying routes for a new transmission line is a sensitive one that involves significant information gathering and evaluation. Input from local, state and federal officials, resource agencies, landowners and the public also contributes to route development. The Zephyr project team has spent more than a year identifying and re...
